Subject: Items in Unimatic Notice of Deficiency to be Discussed in Conference Call

230711

Gene,

In my January 29th letter to you, I requested the convening of a conference call to discuss with you, the technical coordinator and the hydrogeologist for the Unimatic case several ambiguous requirements and disputed technical issues. I further discussed the advisability of this conference call with Steve Maybury, and it was addressed in his January 31 e-mail to me. Consequently, as requested by Steve in his e-mail, I have attached to this e-mail my list of items to be discussed with the Unimatic case team, and a brief description of the issues involved.

We would propose to have the conference call on any of the following dates: Wednesday, February 7 in the afternoon; all day Thursday, Feb. 8; Friday Feb. 9 any time after 10:30; Monday, February 12 any time after 11; or any time Wednesday, Feb. 14 or Thursday, Feb. 15. Please let me over the next day or two of a date and time that will work for our conference call. Thanks.

Bill Friedman
